

THE SUPRAMENTAL HARMONY POWER SETTLES IN THE ASHRAM

(T.R. Thulasiram, Sri Aurobindo Ashram)

Since some days and especially from 1st January, '89, a new surge of a great divine power is being felt by some inmates to have settled in the Ashram, bringing harmony in the physical also. Evidently it is the same Supramental Power of Grace as felt before only on the Darshan days. A plain paper touched nowadays in the Ashram, ~~near the Samadhi~~ or in Mother's or Sri Aurobindo's room vibrates with the same kind of power as in the paper touched on Darshan days in collective meditation between 10 to 10.30 a.m.

Apparently it has come to help in the cure of Sri Champaklal, but the event itself has wider and deeper implications of the fulfilment of mission of the Masters. But something was done on the surface by the author of this article, as a help for Champaklal, by invoking the Supramental Being behind the Superman Consciousness which came from the environmental atmosphere and entered into the Mother's body in 69 and 70 only but as a consciousness with shadowless golden light and a very human smiling benevolence and with a power to enter all the physical bodies - thereby implying that someone had realised the Supramental Truth and the transformation of nature and body before, so as to enter the Mother and help her in her body-transformation.

The Mother's picture taken on 5-7-69 shows only the power of Superman consciousness which is also felt in her picture with candle flame taken on 4-5-67 and in her balcony darshan picture on 24-11-67 --- when an unknown being physically or bodily ~~is~~ ~~is~~ interposed in her body but bringing supramental force to pass it on to the audience of devotees. She said that this being was not of Sri Aurobindo nor of any god or goddess. It is significant to note that the said three pictures and Sri Aurobindo's as sitting in his sofa taken in 1950 vibrate nowadays with the New Power, i.e. with Supreme Equality of the Supreme Reality in their eyes, Satchitananda power in their environment and the Supramental Power of Grace-Light in their body - the same triple powers in combination as felt in the papers touched on Darshan days.

One can go back to the Siddhi days of the Ashram on 24th November 1926. It was the same Supramental Being that manifested then as now, but was differently regarded according to the impact or receptivity of Its power in the body of the recipients -- as over mental consciousness in 1926, as superman cons-

sciousness in 1969, and now, we regard it since 1st January 89 as the Supramental proper, because the Superman consciousness power of the said pictures has changed into the Supramental kind as above said, Even in 1926, two days after the Siddhi day i.e., on 26th November 1926, the Mother felt the entry of this Supramental Being in her body when She regarded it as a power of physical Immortality and distributed to all disciples the water charged with this power by touch of her hands. The tomatoe soup that is distributed to celebrate this event every year on 26th November (see Mother India Feb. 76), distinctly gives out by touch the high Supramental power as felt in the said papers and pictures. All the 24 disciples had felt the impact of Its power on the Siddhi day itself and Datta the English lady disciple declared "The Lord has entered my body". Even the narration of the event as given by Purani, if written on a paper and touched, vibrates with the same Supramental power.

One can go back to the Still earlier ~~pw~~ period when the Mother was young and had the contact in vision around 1906, with a marvellous Being of Light who came in human form as a beautiful man with a luminous body surrounded by radiation of white dazzling light from his body all around and from overhead to under the feet, and hence appearing as a oval shape of light. (see Bulletin Nov.82 and Aug.84) The Being assured her of collaboration in the works of harmony in the world that awaited to be done. The nature of shadowless light around his body, and above the head and below the feet necessarily makes that Being a supramental being in nature and body.

In 1931, I had the experience of a Being of Light. He came in a human form of body with the Light of Grace dynamically radiating, pulsating and vibrating all around his body and from overhead to below the feet, and hence seen as oval light in shape. The Being came and sat on my bed-cot, and after a few minutes went away, without walking, but moved by the dynamic propulsion of the vibrant, living and transparent white light of Grace. The Mother too appeared ~~in~~ the next day in her luminous body when She caught hold of my hand and gave me the mantra of "Arut Perum Jothi" (The Supramental Grace-Light) which was heard with reverberations in the depth of my heart. Because of this event of a personal nature, I could recognise and identify the historic person of the Being of Light. I consider it a work of their collaboration. The

Being of Light is the one who had spoken on body-transformation by the Great Light of Grace (Arut Perum Jothi) and affirmed the transformation of his nature and body into their deathless states. Eventually in the concrete presence of the Supreme Divine who settled down at his place on 30th January 1874, dematerialised his luminous ^{he} deathless body to fulfil his already declared object of entering into all the physical bodies. However, it is provable that he has entered into the close environ of the physical bodies of all persons the world over, but waiting to enter in their body in the opportune time. His power can be felt by everybody by touching in one's photo the body at first for a minute, and then its environ (or top corners of the photo), or by alternately touching the body and environ. In case of saints, yogis and sages his power can be felt at the top corners of their photo.

The said Being of Light is too familiar in this region to be named here. He brings the power of Grace if one simply remembers the Supramental Grace-Light (Arut Perum Jothi) which is the Supreme Grace-Light of summit Supermind with the power of transformation of even the body. It is far more powerful than the Supramental Light as brought by the Mother from the lower-supermind into an universal manifestation in the subtle physical of the earth. The latter light agrees in its powers with the superman consciousness or rather we may say it equalled to the body-power of the Mother as in her photos on 5-7-69, 4-5-67 and 24-11-67 until recently before it changed into the new supramental power. The joining of the two levels of Light from the Supermind is of immense evolutionary significance to the earthly life and its transformation, and this would help reach the great many sadhaks who are now in their low key or levels of yogic endeavour.

Now to come back to the starting point, I touched in my house on 16th December '88 two pictures, one of The Mother as on 5-7-69, and the other of the historic person of the said being of Grace-Light, simultaneously in their forehead and heart centres, besides seeing into the eyes of the latter. The Superman Power of the former changed into the Supramental and became one of reconciled with the latter when touched now again in their body, and environ and seen in their eyes. The Mother's picture with its new power was sent the next day on 17th December to her room where it was kept on her seat and brought back to me. It continued to vibrate with the Supramental power of the said Being of Light. I was very happy

that The Mother has accepted him and his power. In fact since 17th December '88 the Ashram has come to be possessed by this New Power and I felt it directly and as well as in the paper touched objectively near the Samadhi and in Sri Aurobindo's room where I felt a tremendous Grace-power never felt before in such an intensity, some others are also feeling the change to New Power in the Ashram, and even in their house. After due verification and confirmation of it, I happily disclosed this truth on 1st January '89 to a number of fellow sadhaks and the elders of the Ashram. It has taken place twenty years after my joining on 1st January 69, the day of Superman consciousness. The said paper shows All Round Harmony Power as felt on 24th April Darshan. It is a combined Harmony Power of supermind -- Satchitananda -- supreme Equality of the Supreme Reality. The same powers can be felt by touch of the said pictures of the Masters in their body and environ and eyes respectively. They are the same as in the picture of the Being of Grace-Light.

Milk charged with this new power by touching it in the Mother's room simultaneously with her new power-picture of 5-7-69 was sent to Champakial once or twice. He is almost recovered and has since returned to his room at the end of December. Our Gratitude flows to the Masters Sri Aurobindo and the Mother. Because of their tapas and fulfilment the transforming Supramental Grace-Power of Harmony has come to settle permanently in the Ashram down to the physical so as to be felt even at our body-level. Daily we shall make avail of this power especially between 11-30 to 12-15 noon time to receive it even if we happen to be in our home.

The Mother should have come to know of the historic person of the Being of Grace-Light on 11th July 1970 when the Grace-Light and his body-transformation into its deathless state were referred to her. She spontaneously said that he was in direct contact with the supermind and that she liked very much the name of Grace-Light (Arut Jothi) and She distinguished its three levels, or degrees by her experience (see The Mother's Agenda on 11th July 1970). However, Satprem mistook his dematerialisation for death and wrongly reported of this ^{as} death, to the Mother. That does not matter for our purpose here. That Being of Grace-Light always joins in the blessings of the Mother and Sri Aurobindo whom we remember and with whom we are ~~per~~ personally connected. Our Gratitude arises for their collaboration and works of harmony that await to be done now and in the eternal future.
